AFX FX-10 CAF® VENTILATION SYSTEM

CAF® CONTROLLED AIR FLOW VENTILATION SYSTEM EXPLAINED

CHIN VENT

The shape and size of the FX-10 chin vent is designed for optimal airflow and reduced noise. Its compound curved design was developed to allow airflow to smoothly pass over the chin area of the helmet.

In the open position air is redirected up the inside of the face shield rather than through the front jaw. This greatly reduces the chance of fogging and promotes an even airflow across the inside surface of the face shield. This feature is similar to the windshield vent found in most modern automobiles.

TOP VENT

Like the chin vent, the top forehead vent is aerodynamically designed to optimize airflow. In the open position air is forced into large intake holes in the outside vent cover, and channeled to the forehead area. Once inside the helmet, air is directed along paths designed into the liner. These air paths lead the air around both sides of the top of the head.

SIDE AIR EXIT VENTS

The most noticeable feature of the new CAF® system is the side air exit vents. These vents are designed to allow air inside the chin area to be drawn out through the side of the helmet. Air passing over these vents creates a vacuum inside the vent area.

In the open position air inside the chin area is drawn out through passages in the front chin bar to the side of the helmet, where fast moving air over the vents pulls the air out through the back of the vent. The function of this vent is controlled by small switches on the outside of the helmet incorporated into the vent design. This provides the convenience of being able to open or close the vents without having to remove the helmet.

FX-10 Multi Snow

STANDARD FEATURES

- * MEETS OR EXCEEDS : DOT FMVSS-218
- * CONSTRUCTED USING THERMO-PLASTIC POLY ALLOY
- * AERODYNAMIC SHELL DESIGN
- * CLEAR COAT FINISH PROTECTS HELMET PAINT AND GRAPHICS AND LOOKS GREAT
- * RECESSED FOREHEAD AND AERODYNAMIC CHIN VENTS PROVIDE INCREASED AIRFLOW AND REDUCED WIND NOISE
- * OUTSIDE ADJUSTABLE SIDE VENTURI AIR VENTS INCREASE EXHAUST AIR FLOW
- * FLUSH FIT QUICK RELEASE SIDE COVERS WITH SINGLE TURN SCREW
- * DOUBLE LENS THERMAL PANE FACE SHIELD
- * VENTED CHIN CURTAIN
- * MOLDED THERMAL FORMED BREATH GUARD
- * AMPLE EAR CAVITY FOR SPEAKERS
- * SQUARE TYPE D-RING WITH CHIN STRAP HOLDER

AVAILABLE SIZES

THREE YOUTH SIZES :

YOUTH SMALL = ADULT XXXS

YOUTH MEDIUM = ADULT XXS

YOUTH LARGE = ADULT XS

The Helmet That Can Grow With Your Child

By simply replacing the cheek pads and liner a FX-6R helmet can be transformed to comfortably fit a child with any of three youth helmet sizes: Youth Small, Youth Medium or Youth Large. For example, you could take an existing Youth Small FX-6R helmet, pop out the cheek pads and removable liner, replace them with the Youth Large cheek pads and liner, and end up with a Youth Large FX-6R helmet. Since the physical shell of the FX-6R helmet never changes, the impact safety provided by DOT-approved youth helmet is not affected by the change.
